Professional poets spend many hours crafting a finished piece of work, yet we expect children in school to sit down and write when they are told to, whether they feel inspired or not. This series of four books is a toolkit to help you build a positive framework for children to read, write, understand and enjoy poetry - to bring a creative spark to the poetry classroom. A combination of featured poems, creative ideas, structured lesson plans and differentiated photocopiable activity sheets gives the series a uniquely flexible approach - which means you can use the materials in any classroom context. If you're wary of poetry, if you think it's boring, or if you're nervous about teaching poetry, then you've chosen the right book. Key themes covered in BOOK 3: Style, Shape and Structure are style and structure, addressing regular and standard forms, the impact of layout, free form, 'found' poetry, and concrete poetry. Other books in the series are: BOOK 1: Words and Wordplay; BOOK 2: Rhymes, Rhythms and Rattles; and BOOK 4: Language and Performance.

The Two-Soul'd Animal illuminates an early modern debate that recognized the troubling extent to which Christian thought had defined the human in terms of two incompatible models of soul. As the sixteenth century progressed, Christian and humanist thinkers began to realize that these two souls fundamentally contradicted each other. On the one hand, Christian theology had a great debt to Aristotle's tripartite model of the soul based on three organic faculties: intellection, sensation, and nutrition. On the other, the Christian soul was defined by its immortal, immaterial, and transcendental substance. The sixteenth-century acknowledgement of the two souls provoked a great deal of anxiety, leading Christian thinkers to ask: How can we, as God's perfect design, have two redundant and yet contradictory souls? And how could the core of the religious subject possibly be defined by a psychological paradox? As a result, the soul was an intrinsically unstable term being renegotiated in Renaissance culture. The English writers studied in The Two-Soul'd Animal place two prevailing interpretations of the soul's faculties—one rhetorical on the plane of aesthetics, the other theological on the plane of ethics—into contact as a way to construct a new mode of Christian agency.
