An introduction to bookbinding, offering a range of projects that draw on this art. There is guidance on the best materials and equipment to use, how to make folded books and pamphlets, and how to use different stitches and attach boards. Projects include albums, diaries, journals and box books.

Provides essential guidance with clear step-by-step instructions for creating a variety of books, pamphlets, albums, journals, and diaries.

In an entertaining how-to manual, a noted photographer shares his professional secrets for creating innovative photographs of children and family life, with easy-to-follow tips and instructions that cover every aspect of the creative process of capturing important family milestones and moments for both digital and film photographers. Original. 15,000 first printing.

Flexible in approach and full of colorful examples, this textbook provides a basic introduction to what art is and can be in the lives of people who do not necessarily think of themselves as "artists." You will be taught about a variety of art themes, genres, materials, and processes that appeal to novice art makers. The lessons are organized by themes of general subject matter or media. Options are available for work in mixed media, crafts, photography and digital media, as well as in traditional drawing or painting media. After picking a theme of particular interest to you, look next at the four strands of lessons presented in that thematic unit. Moving from left to right, select one lesson from each consecutive strand and complete that lesson. Because each lesson builds upon previously presented knowledge and developed skill, as you progress through four lessons, one from each strand, you should grow in your understanding of art concepts, meanings, and processes, while also improving your art making skills. Completing this course will help you develop a new appreciation for the power and possibilities of art learning, by understanding better the art others create, as well as making it yourself.

A crafting anthology that allows readers to experience the magic of storybooks again in a marvelous new way by recreating and reinterpreting the picture book offers a host of ideas and inspiration and presents lovingly designed story spreads and covers. Original.

The first critical study of writing without language In recent years, asemic writing—writing without language—has exploded in popularity, with anthologies, a large-scale art exhibition, and flourishing interest on sites like tumblr, YouTube, Pinterest, and Instagram. Yet this burgeoning, fascinating field has never received a dedicated critical study. Asemic fills that gap, proposing new ways of rethinking the nature of writing. Pioneered in the work of creators such as Henri Michaux, Roland Barthes, and Cy Twombly, asemic writing consolidated as a movement in the 1990s. Author Peter Schwenger first covers these “asemic ancestors” before moving to current practitioners such as Michael Jacobson,

Rosaire Appel, and Christopher Skinner, exploring how asemic writing has evolved and gained importance in the contemporary era. Asemic includes intriguing revelations about the relation of asemic writing to Chinese characters, the possibility of asemic writing in nature, and explanations of how we can read without language. Written in a lively style, this book will engage scholars of contemporary art and literary theory, as well as anyone interested in what writing was and what it is now in the process of becoming.

Works on Memory is a collection of essays and images charting the last ten years of Portuguese artist Daniel Blaufuks' practice, published on the occasion of his exhibition at Ffotogallery. The distinct black & white format of the book is based on designs by the French publishing imprint Série Noire who released detective thrillers in the 1950s. Daniel Blaufuks is an artist fascinated by the processes of memory – how we construct meaning in our lives through the accrual of details and traces, from the mental residue and after-images of our daily existence. Blaufuks is interested not only in the ways that photography and film are changing as media, but also in the methods by which we archive, store and retrieve information – our ability to remember. Blaufuks' photographic images of film canisters, cassette tapes, celluloid film strips and negatives etc. remind us that as each analogue 'memory container' is superseded by new technological developments, our capacity to record data may increase exponentially, but something is also lost in the process. With a keen eye Blaufuks observes these evolutionary changes in the way we make, distribute and read images, curious to understand how our future memory will be different. For Blaufuks, photography is more than simply a trigger for retrieving past memories. Photography is memory.
