reporting principles used in a variety of business entities. The new edition continues to provide strong coverage based on continuous case examples that tie all of the disparate details of Advanced Accounting together for the students. The text is highly illustrated with complete presentations of worksheets, schedules, and financial states so that students can see the development of each topic. Inclusion of all recent FASB and GASB pronouncements and the continuing deliberations of the authoritative bodies provide a current and contemporary text for students preparing for the CPA Exam and current practice. The book's building block approach introduces concepts with simple examples and then gradually introduces complexity, allowing students to easily keep pace with the material.

Financial accounting is undergoing a

period of unprecedented change. The FASB and IASB have been working together to issue converged accounting standards that will dramatically change key reporting areas, and more generally have sought to converge accounting standards over time. However, at present the convergence process appears to have stalled with respect to new standards, and it is not clear when, if ever, IFRS will be fully incorporated into U.S. GAAP. So, while there is considerable overlap between U.S. GAAP and IFRS, important differences between U.S. GAAP and IFRS will remain for the foreseeable future. To help instructors deal with this very challenging environment, the Spiceland team is committed to providing current, comprehensive, and clear coverage of intermediate accounting, and the eighth edition reflects this.
