step from initial needs analysis through the evaluation of a training program's effectiveness; shows the relationship between training and organizational change, and explores how the competencies of each discipline

~~Effective Training: Systems, Strategies, and Practices ...~~

An effective training program is built by following a systematic, step-by step process. Training initiatives that stand alone (one-off events) often fail to meet organizational objectives and participant expectations. In today's post we outline the five necessary steps to creating effective training programs that drive positive business impact.

~~5 Steps to Creating and Implementing Effective Training ...~~

Placing training activities in the context of organizational strategy, it emphasizes the conceptual and practical value of developing training programs that effectively meet strategic and tactical needs, with practical examples provided for both large and small organizations.
