This book is a collection of best-selected research papers presented at the Second World Conference on Internet of Things: Applications & Future (ITAF 2020) organized by Global Knowledge Research Foundation during 16 - 17 December 2020. It includes innovative works from researchers, leading innovators, business executives and industry professionals to examine the latest advances and applications for commercial and industrial end users across sectors within the emerging Internet of things ecosphere. It shares state-of-the-art as well as emerging topics related to Internet of things such as big data research, emerging services and analytics, Internet of things (IoT) fundamentals, electronic computation and analysis, big data for multi-discipline services, security, privacy and trust, IoT technologies and open and cloud technologies.

An authoritative, entertaining examination of the ultimate thrill ride Until recently the stuff of sci-fi fiction and Star Trek reruns, teleportation has become a reality-for subatomic particles at least. In this eye-opening book, science author David Darling follows the remarkable evolution of teleportation, visiting the key labs that have cradled this cutting-edge science and relating the all-too-human stories behind its birth. He ties in the fast emerging fields of cryptography and quantum computing, tackles some thorny philosophical questions (for instance, can a soul be teleported?), and asks when and how humans may be able to "beam up."

It highlights the use of teleportation in fiction, describes the science behind the superpower, and explores how teleportation may one day be possible! Additional features provide visual support to the text by profiling a popular superhero with the power, showing how teleportation would affect the human body, and more!

The material in this book forms the basis of an interdisciplinary, college-level course, which uses science fiction film as a vehicle for exploring science concepts. Unlike traditional introductory-level courses, the science content is arranged according to major themes in science fiction, with a deliberate progression from the highly objective and discipline-specific (e.g. Reference Frames; Physics of Space Travel and Time Travel) to the very multi-disciplinary and thought-provoking (e.g. Human Teleportation; Science and Society). Over 100 references to science fiction films and television episodes are included, spanning more than 100 years of cinematic history. Some of these are conducive to calculations (solutions included).

It is the future, when teleportation is not only feasible but now being blended with society's imaginings of physical beauty. What would you do if you could teleport your memories, longings, experiences and personality into your personal version of physical perfection? Lucy catches sight of an improved version of herself - the 3DMe - during a commercial. The Tele-P-elastics company is advertising for candidates to trial plastic surgery during teleportation. The display takes her breath away and ignites a longing inside to become the perfect on-screen version of her physical self. She believes she is in love with a man who truly doesn't feel the same for her and this causes her to think that a re-made Lucy will catch his eye and his heart. Along comes Daniel tall, interesting, attractive and ostensibly interested in Lucy. Can he help her to see her inner beauty or will Lucy succumb to pop-culture's pressure and become the someone she believes she was meant to be?

Indic Visions is the tenth book by the acclaimed scientist and humanist Varadaraja V. Raman. In it he provides a detailed introduction to Indic religions and contemporary interpretations thereof consistent with modern science. In a world of rapid changes, dangerous fundamentalism, parochial chauvinisms, culture wars, and clashing civilizations, this book provides both a soothing balm and potent antidote. By delving more deeply into Indic civilization, Raman shows us the way to transform our emerging global civilization in wholesome and healthy ways consistent with science and the great challenges of the 21st century.

This book is a voice. A voice, that speaks to this world of science and technology, that "I am the Lord, who makes all things, who stretches out the heavens all alone" (ISAIAH 44:24). In this most amazing book, you will be thrilled to discover the science involved in the wondrous works of God. You will realize that science always proves the Scriptures. Explore a new world of God science: • Is Space empty or is it a fabric? • Why hurricanes always strike the East Coast of America and very rarely the West Coast? • Is the Earth founded on the waters? • Does the Bible talk about "Einstein's Time Dilation"? • Are there aliens in the Bible? • Will the Sun be darkened? • Discover how God travels faster than light. And much much more
