SAVE when you order this item as part of a set. This easy-to-read manual provides professionals with a thorough introduction to the Inventarios, the Spanish adaptation of the MacArthur Communicative Development Inventories (CDIs), standardized, parent-completed report forms designed by top language researchers to assess language and communication skills in young children ages 8-30 months. Along with an extensive overview of the two inventario forms--Primeras Palabras y Gestos and Palabras y Enunciados--the manual includes detailed guidelines on using the forms, including information on administration, scoring, interpreting a child's score, and using the norms with older children, second-language learners, and children from families of low socioeconomic status clinical applications, such as screening for language delay, creating intervention strategies, and evaluating treatment effects research applications, such as matching children on language skills and examining the influence of other variables on language development technical data, including complete information on the development of the Inventarios, the norming data supporting them (including percentile tables and figures), and validity and reliability of the forms With this comprehensive guide, speech-language pathologists, child development specialists, and other professionals who work with young children and their families will use the Inventarios with confidence. Learn more about the CDIs and the Inventarios.

Sold in packages of 25 for easy re-ordering, this is one of the two standardized, parent-completed report forms that make up the Spanish adaptation of the MacArthur Communicative Development Inventories (CDIs), which was designed to assess language

With the Inventarios, the Spanish adaptation of the MacArthur Communicative Development Inventories (CDIs), professionals can tap into parents' invaluable day-to-day knowledge about their children's language and communication skills--and respond to legislation that requires parental input in child evaluations. Top language researchers developed these standardized, parent-completed report forms to assess language and communication skills in young children ages 8-30 months. They've designed the forms to focus on current behaviors and salient emergent behaviors that parents can recognize and track. The Inventarios have three components: Inventario I: Primeras Palabras y Gestos. This "words and gestures" form is for use with children ages 8-18 months. The first part of the form prompts parents to document the child's understanding of hundreds of early vocabulary items separated into semantic categories such as animal names, sound effects, and question words. Parents mark the words understood or used, and the form yields separate indexes of words understood and words produced. The second part of the form asks parents to record the communicative and symbolic gestures the child has tried or completed. This form generally takes 20-40 minutes to complete and 20-30 minutes to score by hand. Inventario II: Palabras y Enunciados. This "words and sentences" form is for use with children ages 16-30 months. In the first part of the form, parents document the child's production and use of hundreds of words divided into semantic categories similar to the ones on Inventario I. The second part analyzes the child's early forms of grammar and the complexity of the child's multi-word utterances. Parents identify the words the child has understood or used and provide written examples of the child's three longest utterances. This form generally takes 20-40 minutes to complete and 20-30 minutes to score by hand (it is also desktop scannable with the appropriate software). User's Guide and Technical Manual. The manual for the Inventarios is written in English and provides detailed instructions for administering, scoring, and interpreting the forms: various uses of the inventories for clinical and research purposes; background information on the development of the forms; technical reports on the reliability and validity; and tables and graphs of norming data. Numerous studies document the reliability and validity, clinical utility, and research potential of the CDIs and Inventarios. The CDIs were normed on approximately 1,800 children in three locations, and the Inventarios were normed on more than 2,000 children. The CDI and Inventario forms were developed separately to reflect the vocabulary and grammatical structure of each language. Learn more about the Inventarios and the CDIs.

This book bridges the gap in the literature on Hispanic individuals for student clinicians and professionals in Speech-Language Pathology/Speech Therapy. It links empirical and theoretical bases to evidence-based practices for child and adult Spanish users. This volume provides both students and licensed professionals in speech-language pathology much-needed multidisciplinary bases to implement clinical services with Spanish speakers. Researchers and practitioners from Speech-Language Pathology, Neurolinguistics, Neuropsychology, Education, and Clinical Psychology provide theoretical and empirical grounds to develop evidence-based clinical procedures for monolingual Spanish and bilingual Spanish-English children and adults with communication disorders.
