In these twenty-nine interviews, Said addresses everything from Palestine to Pavarotti, from his nomadic upbringing under colonial rule to his politically active and often controversial life in America, and reflects on Austen, Beckett, Conrad, Naipaul, Mahfouz and Rushdie as well as fellow critics Bloom, Derrida and Foucault. Said speaks here with his usual candour, acuity and eloquence - confirming that he was in his lifetime among the truly most important intellects of our century.

This title provides a collection of interviews with Edward Said, a foremost thinker of our times.

Politics, Philosophy, Culture: Interviews and Other ...

Politics, Philosophy, Culture contains a rich selection of interviews and other writings by the late Michel Foucault. Drawing upon his revolutionary concept of power as well as his critique of the institutions that organize social life, Foucault discusses literature, music, and the power of art while also examining concrete issues such as the Left in contemporary France, the social security system, the penal system, homosexuality, madness, and the Iranian Revolution.

In these six essays--delivered on the BBC as the prestigious Reith Lectures--Edward Said addresses the ways in which the intellectual can best serve society in the light of a heavily compromised media and of special interest groups who are protected at the cost of larger community concerns. Said suggests a recasting of the intellectual's vision to resist the lures of power, money, and specialization. In these pieces, Said eloquently illustrates his arguments by drawing on such writers as Antonio Gramsci, Jean-Paul Sartre, Regis Debray, Julien Benda, and Theodore Adorno, and by discussing current events and celebrated figures in the world of science and politics: Robert Oppenheimer, Henry Kissinger, Dan Quayle, Vietnam and the Gulf War. Said sees the modern intellectual as an editor, journalist, academic, or political adviser--in other words, a highly specialized professional--who has moved from a position of independence to an alliance with powerful corporate, institutional, or governmental organizations. He concludes that it is the exile-immigrant, the expatriate, and the amateur who must uphold the traditional role of the intellectual as the voice of integrity and courage, able to speak out against those in power.

Raymond Williams made a central contribution to the intellectual culture of the Left in the English-speaking world. He was also one of the key figures in the foundation of cultural studies in Britain, which turned critical skills honed on textual analysis to the examination of structures and forms of resistance apparent in everyday life. Politics and Letters is a volume of interviews with Williams, conducted by New Left Review, designed to bring into clear focus the major theoretical and political issues posed by his work. Introduced by writer Geoff Dyer, Politics and Letters ranges across Williams` s biographical development, the evolution of his cultural theory and literary criticism, his work on dramatic forms and his fiction, and an exploration of British and international politics.

Moses is pictured as idealist reformer, and political manipulator as his rise to power and eventual domination of New York State politics is documented

More than three decades after its first publication, Edward Said’s groundbreaking critique of the West’s historical, cultural, and political perceptions of the East has become a modern classic. In this wide-ranging, intellectually vigorous study, Said traces the origins of "orientalism" to the centuries-long period during which Europe dominated the Middle and Near East and, from its position of power, defined "the orient" simply as "other than" the occident. This entrenched view continues to dominate western ideas and, because it does not allow the East to represent itself, prevents true understanding. Essential, and still eye-opening, Orientalism remains one of the most important books written about our divided world.

Since 2006, Henry Jenkins’s Confessions of an Aca-Fan blog has hosted interviews in which academics, activists, and artists have shared their views on the changing media landscape. For the first time, Jenkins – often called “the Marshall McLuhan for the twenty-first century” – compiles some of these interviews to highlight his recurring interests in popular culture and social change. Structured around three core concepts – culture, learning, politics – and designed as a companion to Participatory Culture in a Networked Era, this book broadens the conversation to incorporate diverse thinkers such as David Gauntlett, Ethan Zuckerman, Sonia Livingstone, S. Craig Watkins, James Paul Gee, Antero Garcia, Stephen Duncombe, Cathy J. Cohen, Lina Srivastava, Jonathan McIntosh, and William Uricchio. With an introduction from Jenkins and reflections from each interviewee, this volume speaks to a sense of crisis as contemporary culture has failed to fully achieve the democratic potentials once anticipated as a consequence of the participatory turn. This book is ideal for students and scholars of digital media, popular culture, education, and politics, as well as general readers with an interest in the topic.

The renowned literary and cultural critic Edward Said was one of our era’s most provocative and important thinkers. This comprehensive collection of his work, expanded from the earlier Edward Said Reader, now draws from across his entire four-decade career, including his posthumously published books, making it a definitive one-volume source. The Selected Works includes key sections from all of Said’s books, including his groundbreaking Orientalism; his memoir, Out of Place; and his last book, On Late Style. Whether writing of Zionism or Palestinian self-determination, Jane Austen or Yeats, or of music or the media, Said’s uncompromising intelligence casts urgent light on every subject he undertakes. The Selected Works is a joy for the general reader and an indispensable resource for scholars in the many fields that his work has influenced and transformed.

A groundbreaking exploration of what it means to be a late bloomer in a culture obsessed with SAT scores and early success, and how finding one’s way later in life can be an advantage to long-term achievement and happiness. We live in a society where kids and parents are obsessed with early achievement, from getting perfect scores on SATs to getting into Ivy League colleges to landing an amazing job at Google or Facebook--or even better, creating a startup with the potential to be the next Google or Facebook or Uber. We see software coders becoming millionaires or even billionaires before age 30 and feel we are failing if we are not one of them. But there is good news. A lot of us--most of us--do not explode out of the gates in life. That was true for author Rich Karlgaard, who had a mediocre academic career at Stanford (which he got into by a fluke), and after graduating, worked as a dishwasher, nightwatchman, and typing temp before finally finding the inner motivation and drive that ultimately led him to start up a high-tech magazine in Silicon Valley, and eventually to become the publisher of Forbes magazine. There is a scientific explanation for why so many of us bloom later in life. The executive function of our brains doesn’t mature until age 25--and later for some. In fact our brain’s capabilities peak at different ages. We actually enjoy multiple periods of blooming in our lives. Based on several years of research, personal experience, and interviews with neuroscientists and psychologists, and countless people at different stages of their careers, Bloom reveals how and when we achieve full potential--and why an algorithmic acuity in math is such an anomaly in terms of career success.
