The Simplest Quadratic. The simplest Quadratic Equation is: $f(x) = x^2$. And its graph is simple too:

Graphing Quadratic Equations - MATH Key Points. The graph

Download Free Quadratic

of a quadratic function is a parabola whose axis of symmetry is parallel to the y -axis. The coefficients $a, b, a, b,$ and c in the equation $y = ax^2 + bx + c$ control various facets of what the parabola looks like when graphed.

We're asked to graph
the following

equation y equals $5x$
squared minus $20x$
plus 15 . So let me get
my little scratch pad
out. So it's y is equal
to $5x$ squared minus
 $20x$ plus 15 . Now
there's many ways to
graph this. You can

Download Free Quadratic

just take three values for x and figure out what the corresponding values for y are and just graph those three points.

In earlier chapters we've shown you how to solve quadratic equations by factoring. A quadratic equation as you remember is an equation that can be written on the standard form

Download Free Quadratic

$$ax^2 + bx + c = 0, a \neq 0$$

where $a \neq 0$

You know by now how to solve a quadratic equation using factoring.

Another way of solving a quadratic equation is to solve it graphically. The roots of a quadratic equation are the x-intercepts of the graph.
