Sharing Hidden Know How - publicisengage.ie

Just add the \$ right after the share name without any spaces. You should note that you can only create this hidden share when you first share the folder in Windows 7 and Windows 8. For some reason, you can't change the share name once you've shared the folder, so in order to change it, you have to first remove the share and then re-share the folder.

How to Create a Hidden Network Share in Windows

Viewing Microsoft Windows hidden shares. Hidden shares give users a false impression that the share cannot be found unless it is known. Although true for most users, a user can use many utilities available on the Internet to view all shares, regardless if they are hidden or not. If you are creating a hidden share to protect sensitive data, password protect the share instead of making it hidden. An easy method for users to display any hidden shares on their computer is to use the net use command.
