How we define "soft" skills In 2015, researchers at Burning Glass Technologies provided a clearer definition of both soft and "hard" skills: Hard skills most commonly refer to highly technical tasks that are unique to an occupation or industry. Soft skills refer to more baseline responsibilities, which can include communication and writing in addition to broad technical skills (e.g ...

Welcome to Department of Information Technology. Keeping with the tradition of Anna University in offering new areas of specialization in engineering, the Department of Information Technology was instituted in the year 2001 with the objective of imparting knowledge in cutting-edge technologies in Information Technology and Computer Sciences.

Our world is witnessing a major change in communication patterns, with expanding social spheres, openness in communication and professionals working in multicultural environments. It is crucial, therefore, that India's workforce remains world-class, through re-training and continuous improvement, to remain competent, competitive and successful. To create and nurture successful professionals, the acquisition, cultivation and fine-tuning of soft skills are highly essential in the given business paradigm. The ACE of Soft Skills is a part of this educational process that produces top-notch professionals. Divided into three parts-Attitude, Communication and Etiquette-this unique book provides a broad-based coverage of what constitute soft skills. The foundations of soft skills lie in a strong attitude; this attitude gets manifested as communication, which gets further refined as etiquette. This book covers a wide range of topics-a gamut of nearly 40 essential soft skills-including personal accountability, listening skills, business proposals, and the role of small talk and humour at work. The numerous case studies, cartoons, figures, tables and quotations not only offer an insightful, practical and well-rounded perspective into soft skills, but also make reading a joyful experience.

WRITING PROGRAMS WORLDWIDE offers an important global perspective to the growing research literature in the shaping of writing programs. The authors of its program profiles show how innovators at a diverse range of universities on six continents have dealt creatively over many years with day-to-day and long-range issues affecting how students across disciplines and languages grow as communicators and learners.

Educational commissions continue to press the need for growth in higher education. In particular, universities in developing countries persist in putting their academic theory into practice by aiming to integrate their intellectual and cultural traditions into higher education. Evolving Corporate Education Strategies for Developing Countries: The Role of Universities presents the theories and opportunities for integrating corporate education into traditional universities as well as highlighting the professional development in different subject areas. This book provides relevant research important for policy makers, practitioners and scholars of higher education.

What Happens in a Man's Innermost... is a cry. Of mind and heart. Of passion and commitment. Of pleasure and pain. Of logic and analysis.

Of concepts and emotions. Of why and wherefore. Of bafflement and wonderment. what happens in a man's innermost... is a soliloquy. Not of a troubled soul but of a soulful soul. Thinking out loud. what happens in a man's innermost... is, i'm sure, not unique to this human being. whoever this 'human being' may be! i know not where from. i only know they come. Unmasked, uncalled, unbidden. flooding, forming, blending. Thoughts falling and rising, flowing and ebbing, rolling, and etching into meaty mixes. Now turbulently gushing forth, now curiously peeping and peeling, now stunningly fretting and fuming, now gently curling over. With a clarity that surprises, with a purpose that questions, with a craze that defines, with an anger that belies belief. Thoughts that frantically search, that maddeningly beckon, that beggingly plead, that pleasure and pain, that bristle and bleed. Finally, all this tumult (hue!) and cry is just storm in a teacup. All this bouncing and battering is just storm before calm. As though nothing ever was that ever was, nothing ever is that ever is, nothing ever will be that ever will be. Mutually defining the 'me' in me.

With the advent of the information and communication technologies, traditional library activities are undergoing transformation in a big way. Modern library's collection includes a vast array of information resources, databases, electronic journals, e-books, digital images, institutional repositories etc. To manage a modern library, library professionals need to have awareness and knowledge on management of electronic resources, federated and discovered tools for single click search, literature techniques, application of RFID and other technologies, user needs and knowledge on soft skills etc. Keeping these perspectives and issues in mind the National Conference on Management of Modern Libraries (NACML) was organized by SEARCH- The health science library in association with the department of Library and Information Science, Manipal University, Manipal The main objective of the conference was to provide an opportunity to LIS professional to explore the ways and means to manage the modern libraries where electronic resources are playing an important role in meeting the information needs of the users and to explore, discuss and share ideas and knowledge related to innovative modern library management systems to meet the needs of the changing environment. In five technical sessions under five different categories titled Technologies for Management, Best Practice in Modern Libraries, digital libraries and Role of Library Professionals in Management of Modern Libraries held over the two days, total 51 papers were presented at the conference. Various challenges and issues related to management of modern libraries were discussed in the technical sessions and some of the authors shared the best practices of their libraries. The author highlighted the importance of digital libraries and stressed the needs of various skills to work in digital environment. The papers presented in the conference have been edited and brought out in the form of a conference proceedings.

In the past, services had a strong local and national focus. Professional services were very likely to be independently and autonomously organized from country to country in order to cater to local needs and local legal requirements. This has since changed radically, and highly integrated business and delivery models around the globe have become the status quo in clients' businesses and strategies. Serving clients on a global level requires professional services firms to adopt a structural change from local to distributed global sales and delivery. This book brings together many years of experience, current perspectives and future ideas of international business practitioners, academics, and market researchers. Along those lines it is structured into four parts. Part I "Winning Strategies and Innovative Ideas" lays the book's foundation: it discusses core strategies behind the globalization movement and introduces the major paradigms and ideas. Part II "Successful Processes for Realization" provides solutions for how to establish successful processes for delivering global professional services. Part III

“Inspired Talent Management” goes to the core of the professional services industry: attracting, developing, and keeping the right talent in the right locations. Finally, Part IV offers “Experiences and Case Studies” on all aspects related to successfully building a globalized professional services firm. In short, this handbook provides professional services firms and their clients alike with a sound foundation for responding strategically to fundamental global changes and turning them into business advantages. It offers a comprehensive perspective of why and how to successfully globalize a professional services firm.

Language is central to our existence and it happens to be the most sophisticated product of the human mind. It is inconceivable to think of ourselves, our societies, our ideas, cultures or identities without language. It is the primary means of socialization, and whatever we know is a result of it. It is the primary medium of construction and dissemination of knowledge, and structures our thought processes in important ways that constitute our identity. In very complex ways, it interacts with the social, political and economic power structures that remain significant in defining the identities of individuals and societies. The essays in this volume create an awareness and understanding about the role of linguistic context in negotiating identity. The book explains identity and the complex relations between language and several aspects of our society. It explores identity through text and context, and will serve to trigger a novel discourse around the centrality of identity in contemporary society.
