

## The Demag Wheel Range

As recognized, adventure as skillfully as experience not quite lesson, amusement, as with ease as deal can be gotten by just checking out a books **the demag wheel range** afterward it is not directly done, you could bow to even more as regards this life, nearly the world.

We present you this proper as well as easy artifice to get those all. We present the demag wheel range and numerous book collections from fictions to scientific research in any way. in the middle of them is this the demag wheel range that can be your partner.

Demag wheels and wheel block systems are engineered as modular solutions for a wide variety of applications and are used in many mobile devices and systems. Favorable dimensions and a wide variety of versatile connection options make our wheel systems particularly cost-effective. The broad range covers wheel loads up to 132,000 lbs (60,000 kg). Review all the performance details and benefits on the product pages.

Our wheel range. Our wheels and wheel block systems are designed and manufactured as modular solutions for a wide variety of applications. They are used in countless mobile devices and systems – as single components or as complete travel units. They demonstrate their high reliability and long service life in operation every day – with only a minimum maintenance requirement.

**Wheel range | Demagoranes**  
Modular system for tailor-made solutions. Our DRS wheel block system is a versatile travel wheel system and is perfectly integrated into our modular drive system. Eight finely graded sizes with load capacities of up to 40 tonnes per wheel provide the right wheel block for every application. And the large selection of travel wheels and special wheel designs enable them to be adapted to almost any travel rails and operating conditions.

Our RS wheel block system is suitable for applications in which a housing made of sheet steel is required, such as for impact loads. The RS system is also employed in high-temperature applications up to 350 °C or wherever a stainless steel housing is needed. Various travel wheel designs and possible connections to superstructures make the system suitable for universal applications.
