platform on Google Cloud Platform.. I've been using Firebase since 2013. I was late to the game :) I use Firebase to power my family's business, Calligraphy.org.I also use it for everything I've developed in the last three years.

~~What is Firebase?. Firebase is a Backend as a Service ...~~

A quick guess: calling `signOut()` signs the user out of Firebase Authentication. It does not sign the user out of the underlying social provider (e.g. Facebook, Google). So next time you start the sign-in flow for that provider, it will be picked up immediately by your code (or the library that you used).

~~Google Firebase sign out and forget user in Android app ...~~

A fire support base (FSB, firebase or FB) is a temporary military encampment to provide artillery fire support to infantry operating in areas beyond the normal range of fire support from their own base camps. FSBs follow a number of plans; their shape and construction varying based on the terrain they occupy and the projected garrison.It was first created by the South Korean General Chae Myung ...
