Overview. The idea that human history is approaching a “singularity”—that ordinary humans will someday be overtaken by artificially intelligent machines or cognitively enhanced biological intelligence, or both—has moved from the realm of science fiction to serious debate. Some singularity theorists predict that if the field of artificial intelligence (AI) continues to develop at its current dizzying rate, the singularity could come about in the middle of the present century.

## The Technological Singularity | ARTECA

This is referred to as the Technological Singularity, after which all models of growth stop working and an era of uncontrollable and irreversible advancement begins, resulting in unfathomable changes to human civilization. This could be humanity's last invention and may result in complete annihilation or unthinkable prosperity.

Singularity proponents often claim that we can achieve computer intelligence just by numerically simulating the brain “bottom up” from a detailed neural-level picture. For example, Kurzweil...

Paul Allen: The Singularity Isn't Near | MIT Technology Review  
Computer technology advances at a faster rate than many other technologies. Computers tend to double in power every two years or so. This trend is related to Moore's Law, which states that transistors double in power every 18 months. Vinge says that at this rate, it's only a matter of time before humans build a machine that can "think" like a human.
